

THE LORAINÉ

Condominium Homes

Fiber Optic Network – The Loraine is wired for the future with state of the art Fiber Optic wiring. When technology catches up to the infrastructure in the building, our residents will be able to enhance their data transfer capabilities, such as:

- Future looking media
- Supports super-high definition television
- Can easily support one to ten gigabits per second data speeds
- Nearly limitless long-distance video, audio and data communications
- Remote File Systems
- Hosted Applications
